Hello,

I live along the Willamette and believe the current EPA proposal for the cleanup of the Portland superfund site is far too weak in it's cleanup goals.

I support the Draft's cleanup option "G" with amendments, namely that the goal of the cleanup must be to end the Fish Consumption Advisory, for all individuals, including breast feeding women, related to pollutants found in the Portland Harbor. The EPA must provide a date by which the advisory will be lifted.

The current EPA's plan removes far too little contaminated sediment from the river and prescribes far too much "Monitored Natural Recovery". I would like to see that at least 1000 acres of polluted sediment be removed.

Those who have liability for the PCBs, PAH, DDT and other toxic and persistent pollutants in the river sediments, must meet their community obligation to do the right thing and conduct a comprehensive and timely cleanup.
